

Information for patients of the pediatric practice Dr. med. Grit Euler  
effective from March 1st 2015

**Dear parents,**

this material is designed to help you and your child, to get an idea of the routines during our visiting hours. We have banned outdoor shoes entirely from our practice, so your children can play on the floor safely.

### **Visiting hours**

Mo	8 am -12 pm
Di	9 am -12 pm / 15 pm -18 pm
Mi	9 am -13 pm *
Do	8 am -12 pm / 14 pm -17 pm
Fr	9 am -12 pm

\* Prophylactic examinations and vaccinations for infants cannot be done without an appointment.

Please note: Last call for patients: 30 minutes before the end of visiting hours.

### **On wednesdays we only take patients who have made an appointment.**

In order to prevent infection during the prophylactic examinations we kindly ask you, not to bring sick children into our practice on wednesdays. In urgent cases, please leave a message on our mailbox.

### **Please plan ahead when it comes to prophylactic examinations and vaccinations.**

Please make your appointments for prophylactic examinations and vaccinations as well as other consultations that require a lot of time, in advance. Please let us know in time if you cannot come in for your appointment.

### **Is there a guarantee for appointments?**

Unfortunately an appointment is not a guarantee that you will be in the consulting room at precisely this time. Acute cases will be treated first, which means that all other appointments will begin later. Especially during the "season of colds"; we kindly ask you to understand that your appointment serves merely as an orientation..

### Help us

In order to spare your child the stressful situation of having to take off layers and layers of clothing in the consulting room, our assistants might ask you to undress your child in the waiting room. Especially for the little ones, that means that you should take off the bodysuit.

Even if your child merely has a "little cold", we will have to take a look at the lungs. We have found that small children start to cry when their clothing is taken off in front of the doctor. We believe that it is less stressful for your child if you do this on your own, without ruffle or excitement. In order to make sure that your child does not get cold, we recommend you bring a blanket or a cardigan for your child.

### Here is what you should bring for every visit to our practice:

- House slippers / cosy socks for yourself and your child
- A warm blanket and a diaper changing mat for small children
- A big, warm cardigan for older children
- Something to drink for your child

### For prophylactic examinations:

- The large yellow prophylactic examination booklet
- The small yellow vaccination booklet (you will receive that with the first vaccination)

### Please do not forget the written declaration of consent for vaccinations

In order for us to vaccinate your child, we need both parents/parties entitled to custody, to give us a written statement of consent. Of course you can amend or change this document at any time. Please bring your vaccination booklet for every vaccination appointment.

### Thank you!

If you have questions, ideas or suggestions for improvements for us, please share them. We are very sensible to new ideas.

Your team of the pediatric practice Dr. Grit Euler
